Planar Lightwave Circuit Splitters Market Forecast

The use of PLC splitters reached 32.8 million units, last year ...

Aptos, CA (USA) – March 26, 2018 -- ElectroniCast Consultants, a leading market and technology consultancy, today announced the report release of their 10-year market forecast of the global consumption of Planar Lightwave Circuit (PLC) splitters used in Fiber Optic Communication Networks.

According to the market review and forecast report, the worldwide consumption volume (quantity) of PLC component-level (bare-fiber) splitters reached an estimated 32.796 million units in 2017. PLC component splitters will continue to contribute an important role in deploying optical fiber closer to the subscriber (Fiber-to-the-Home/Building/Premises), by allowing a single passive optical network (PON) interface to be shared among many subscribers. PLC splitters distribute optical signals from an input optical fiber port to multiple optical fibers output port.

This ElectroniCast study report quantifies PLC splitter compact devices (bare fiber PLC components) and in-turn; PLC splitter devices used in factory-installed/fabricated PLC splitter modules (such as ABS Box modules and other types).

There are several piece-parts that are needed to produce a typical PLC splitter, such as 1 or 2 input optical fibers with an input fiber containment unit, a planar (splitter) chip, a fiber array containment unit, and several output optical fibers, as well as the housing/exterior package. PLC splitters are available in several configurations; the report provides market data on 11-separate configuration (port-count) for the years 2017-2027.

PLC splitter compact devices used in FTTx, Passive Optical Networks (PONs) and other Telecom (and CATV) service provider network applications led in global consumption volume (quantity) with 97.2 percent in relative market share or 31.878 million units in 2017. PLC splitter compact devices used with testing and monitoring applications are forecast to reach 1.24 million units in 2027, up from 841-thousand units last year. Market forecast data in this study report refers to consumption (use) for a particular calendar year; therefore, this data is not cumulative data.

**Worldwide PLC Bare Fiber Splitter Market Share (%) in 2017, by Application
(Compact Devices, Consumption Volume/Quantity, 32.8 Million Units)**

ElectroniCast Consultants – www.electronicast.com specializes in forecasting trends in technology forecasting, markets and applications forecasting, strategic planning and consulting. ElectroniCast Consultants, as a technology-based independent forecasting firm, serves industrial companies, trade associations, government agencies, communications and manufacturing companies, as well as the investment/financial community. Reduction of the risk of major investment decisions is the main benefit provided. ElectroniCast Consultants' goal is to understand the challenges and opportunities facing clients and to provide timely, accurate information for strategic planning.
