### Fiber Optic Fusion Splicers Market Forecast

*According to ElectroniCast Consultants, the worldwide use of new fiber optic fusion splicers is forecast to reach 123-thousand units in 2020...*

**Aptos, CA (USA) – June 2, 2016** -- ElectroniCast Consultants, a leading market and technology research consultancy addressing the optical communications industry, today announced the release of an extensive report covering the worldwide market for Fiber Optic Fusion Splicers. This report provides an analysis of 2015 and a 5-year forecast (2016-2020) of the use of fiber optic fusion splice machines.

A Fusion Splicer is specialized instrument used to join optical fibers together. This market research study report covers the use of fusion splice machines used for fiber optic-based communication applications.

“The Asia Pacific region (APAC) is the largest user of fusion splicers. The volume (quantity) of fusion splicers put into action in the Asia Pacific region is expected to almost double in 2020 versus 2015,” said Stephen Montgomery, Director of the Fiber Optics group at ElectroniCast Consultants. “The People's Republic of China (PRC) is the largest user of new fusion splicing machines in the APAC region, with nearly 34-thousand new units projected in 2016. Single-fiber machine-types are forecast for the fastest volume growth versus multiple-fiber types in China,” Montgomery added.
